

Topographic Map Practice – from topo map to terrain

The topographic map (top) shows an island in the Great Lakes with a hiking trail between Point A and Point B.

Scale: 1 inch = 1 mile

Complete tracing the contour lines on the topo map at the top to the corresponding elevation lines on the lower map.

1- What does the final diagram show about a trail that would pass from point A to point B?

2- What is the distance from point A to Point B in miles? _____
