CT Envirothon Current Issue Webinars: Adapting to a Changing Climate

Join us for a series of webinars to help explain concepts around climate actions and policies.

Titles and days will be added through the end of March. Each will focus on understanding concepts and key ideas on local and global levels. Students are welcome to participate and encouraged to send questions ahead of time for speakers. Questions can be sent to susan.quincy@ct.gov

All webinars will be recorded and uploaded to the CT Envirothon YouTube Channel.

Webinar 1: All About En-ROADS

October 17, 2022 at 3:00 pm

Look at the En-ROADS Climate Action Simulator and how it can help your students address climate actions and issues. This workshop will show the levels of information the simulator contains and how students can use it to help prepare and illustrate information for their oral presentations. We will go over the areas of action and how they relate to field topics and address global perspectives on equity, and technology.

Webinar 2: Why Electric?

November 2, 2022 at 4:00 pm

Jeff Howard, CT DEEP Office of Energy Supply and Infrastructure, will share insight into the choice to go electric. Often, we hear why electric if we use fuel to make electricity? Jeff will explain how the switch to electric for cars and utilities works to address carbon and support green technology. The choice in the fuel supply and how to build a suite of solutions that leads to less greenhouse gas emissions.
