

| 2023 Connecticut Envirothon Oral Presentation Scoring Sheet |           |        |             |
|---|-----------|--------|-------------|
| Climate Adaptation in Connecticut                           |           |        |             |
| Judge ID  | Session # | Team # | Final Score |

| Part 1                                | Framing the Issue  | Circle the Score          |
|---------------------------------------|--|---------------------------|
| 1                                     | The team identified their stakeholders   | 0 1 2 3 4 5               |
| 2                                     | The team explained the issue they are seeking to address   | 0 1 2 3 4 5               |
| 3                                     | The team explained why the issue is a concern for their group  | 0 1 2 3 4 5               |
| 4                                     | The team identified the causes of Global Warming and explained greenhouse gases and their warming potentials   | 0 1 2 3 4 5               |
| 6                                     | The team identified a plan of actions using En-ROADS that will limit global temperature rise to 2 degrees Celsius or less; and included screenshot of the En-ROADS Climate Action Simulation | 0 1 2 3 4 5               |
| 7                                     | The team explained the primary action from their simulation that they will bring to CT   | 0 1 2 3 4 5<br>6 7 8      |
| Section One Total (add up the scores) |  |                           |
| 33 possible points                    |  |                           |
| Part 2                                | Identifying local impacts  | Circle the Score          |
| 1                                     | The team explained how global warming has impacted our climate in CT in more than two natural systems.   | 0 1 2 3 4 5<br>6 7 8      |
| 2                                     | The team explained the risks to natural systems  | 0 1 2 3 4 5<br>6 7 8      |
| 3                                     | The team explained the risks to humans   | 0 1 2 3 4 5<br>6 7 8      |
| 4                                     | The team highlighted how vulnerable communities are impacted   | 0 1 2 3 4 5<br>6 7 8 9 10 |
| Section Two Total (add up the scores) |  |                           |
| 34 possible points                    |  |                           |
| Part 3                                | Proposed actions and outcomes  | Circle the Score          |
| 1                                     | Team identified the action as adaptation or mitigation or both   | 0 1 2 3                   |

|   |  |                      |
|---|--|----------------------|
| 2   | Team identified the need to use green infrastructure   | 0 1 2 3 4 5          |
| 3   | Team explained how they used the FLOWER model to identify benefits and challenges of their actions | 0 1 2 3 4 5          |
| 4   | Team identified which Climate Resilience Fund track and how much they are requesting               | 0 1 2                |
| 5   | Team explained how their action will be maintained and sustained                                   | 0 1 2 3 4 5<br>6 7 8 |
| Section Three Total (add up the scores)<br>23 possible points |  |                      |

| Part 4   | Presentation  | Circle the Score |
|--|---|------------------|
| 1  | <b>Visual Aids</b> used to enhance the presentation were <b>clear, readable, attractive, and effective.</b> | 0 1 2 3          |
| 2  | Presentation was <b>well organized</b> with a <b>clear introduction and a strong conclusion.</b>            | 0 1 2            |
| 3  | Presentation was completed within allotted time (>9, <11 min)   | 0 1 2            |
| 4  | <b>All members</b> of the team had an opportunity to present part of the presentation.                      | 0 1 2 3          |
| Section Four Total (add up the scores)<br>10 possible points |   |                  |
